

**There is a new resource for
Medicare and Medicaid eligible clients
in King and Pierce Counties
who are 65 years of age or older.**

What is MMIP?

- **Integration of Medicare and Medicaid benefits** provided by Evercare Premier™ that combines medical and long-term care services in one package.
- **The goal of MMIP is to focus on** preventive care and healthcare coordination to improve clients' health outcomes and decrease expenditures.

What's the difference between MMIP and Fee-For-Service (FFS)?

- Clients will need to use doctors and providers who belong to the Evercare network.
- Evercare has consulting nurses available on the phone 24 hours per day
- Evercare will assign the client to a Care Manager to help coordinate their medical and long-term care services.
- Evercare provides value-added services and additional benefits

How will clients be enrolled with Evercare for the MMIP project?

- Clients can call Evercare and arrange to enroll by calling 1-866-266-0636.
- Clients can also call the Medical Assistance Customer Service Center for more information or to enroll at 1-800-562-3022 (the number on the back of their medical coupon)

Where do you direct clients for more information?

At Evercare's toll free line **1-866-266-0636**, clients can get information:

- About covered services
- To find out if their doctor or other providers are participating in MMIP
- About how Care Management works
